

## How are we going to work with ChatGPT in the education world?

How are we going to work with ChatGPT in the education world? Is banning it the answer? How effective was it to ban alcohol in the 20th century?

Esther Wojcicki will discuss how education needs to incorporate TRICK (her acronym for success) into the classroom and into parenting to promote thinkers to solve our 21st century challenges. TRICK means to be trusted and respected, given independence, collaborated with instead of dictated to and treated with kindness. She will discuss ways of incorporating TRICK into the classroom and deal with the challenge of ChatGPT.
